### WTC Announces Plans to Bring Free Wi-Fi to Aggieville

Wamego, KS, 04-14-2021 — Aggieville, recognized as the oldest shopping district in Kansas, will soon have something new to offer its visitors. Following a fiber build that brought high quality voice, video, and Internet services to many of the businesses in Manhattan, WTC has announced plans to bring Free Wi-Fi to the Aggieville Business District. WTC's initial focus will be to provide Wi-Fi services along Moro Street, 12<sup>th</sup> street north of Moro, and N. Manhattan Ave., including Triangle Park.

(Wi-Fi Coverage Area)

“Over the last 5 years, we have been immersed in developing and moving forward with a new strategic vision for our District. This new vision will create a hub for social, cultural and economic activity in Aggieville,” stated Dennis Cook, Director of the Aggieville Business Association. “The addition of Free Wi-Fi access will be a giant step forward in our efforts to attract and cultivate customers. We have a plan to grow, and WTC's support of the Aggieville Business District shows that we are moving in the right direction,” Cook added.

WTC hopes this partnership with the Aggieville Business District will help support their vision to bring more visitors to this cozy little district, to see why it is home to over 100 businesses. In addition to offering an improved shopping, dining, and entertainment experience, this Wi-Fi expansion will allow students ways to remain close to broadband access while they wade through the myriad of hybrid and online classes required in today's environment.

“We are very pleased to be announcing plans to bring Free Wi-Fi to Aggieville to help improve the quality of work and play throughout the District,” stated Jeff Wick, General Manager of WTC. “WTC offers its Free Wi-Fi service throughout the other communities we serve, so we are excited to be able to bring this service to the students and visitors of the Aggieville Business District,” Wick added.

WTC’s Wi-Fi network will be strong enough to handle the broadband usage of the multitude of devices in today’s connected environment. They plan to have their Wi-Fi network operational by the end of April.

WTC is headquartered in Wamego (KS) with an office in Manhattan (KS), and provides a full line of Voice, Internet and Video services to residential, governmental, educational and commercial clients.
